

< All In The Family >

Q: What is a family?

Ans: * A family is a group of people who are related to each other.

* Father, mother and children together make a family.

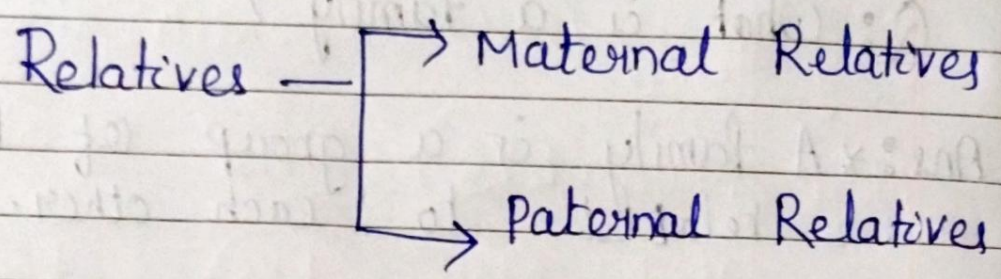

Joint Family:

* A big family in which all the members stay together is called a joint family.

* In a joint family grandparents, uncles, Aunts and cousins stay together.

Nuclear Family: A family in which only parents and children stay together is called a nuclear family.

We have lot of relatives:

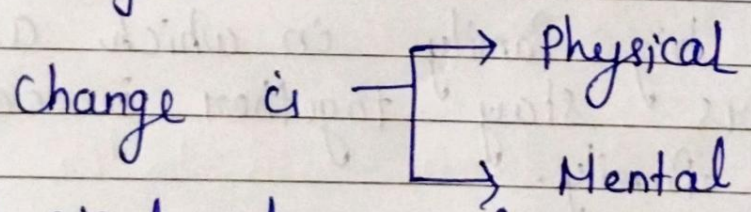

Maternal Relatives: Relatives from mother's side are called maternal relatives.

e.g Maternal Uncle or Aunty.

Paternal Relatives: Relatives from father's side are called paternal relatives.

Note: People change as they grow

Physical change: (Appearance)

The way a person looks like
e.g: fat, tall, thin etc.
when you grow, your height increases and it is a physical change.

Mental change: [Behaviour and Lifestyle]

* The children are able to do more things when they grow like eating on their own, reading, singing etc.
