

Everyone Is Special

- * The cells on our body keep growing in numbers so we keep growing.
- * We continue to grow till we are 18 years of age.

Measuring Height :

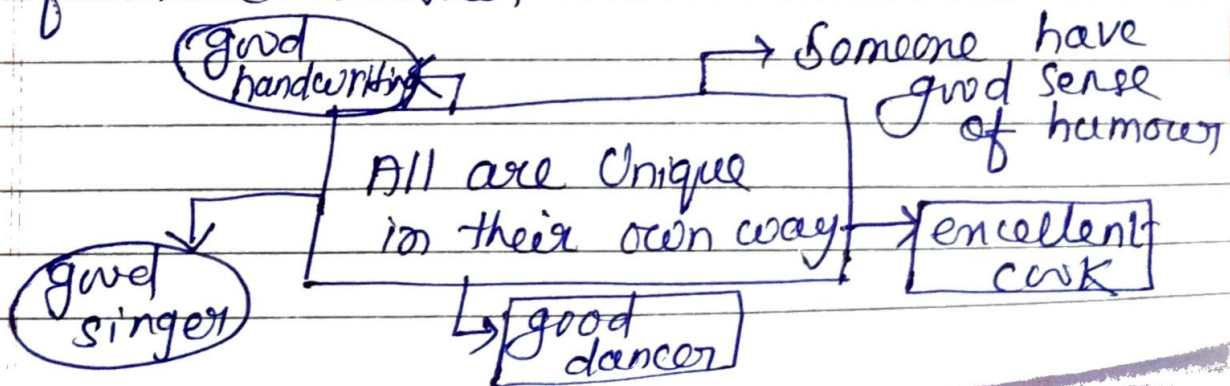

* We measure our height using a measuring tape or a ruler.

1 ft (one foot) = 12 inches

one foot = 30 centimetres

In A Family :

* All members of a family are different from each other

How does a baby communicate?

* Adult communicate by

- speaking loudly/politely or softly
- Hands or facial expressions

* Baby communicates by crying when
 Baby want milk or wants to be cuddled

H.W: Give an example of how your father and mother are different from each other.
