

Fibre to Fabric

Weaving

This process involves the use of two sets of yarn for making a network. If we have a look at the cloth under magnification, we can see that there is a network of threads arranged in a geometric manner perpendicular to each other.

Knitting

When a fabric is made using a single bundle of yarn, it is called knitting. It is similar to the making of a sweater at home.

Terms to Learn

Fabric

Any material that is used for clothing.

Spinning

The process of making yarn from the fibres.

Yarn

Loose threads from which a fabric is made.

Fibres

Yarn unwinds into thin hair-like strands called fibres.
