# Extra Practice Questions

< Ch-1 >

< write the Questions with Ans in copy >

- ① In which generation computer single chip was used?
- ② full form of  $\pm$  CPU, PC
- ③ what is the other name of PC?
- ④ what are 2 important event happened during fourth generation?
- ⑤ what are the use of Integrated circuit?
- ⑥ What ~~are~~ <sup>were</sup> vacuum tubes made up of?
- ⑦ write the name of each generation of computer?
- ⑧ why did ENIAC give off heat?
- ⑨ what do you mean by transistor?
- ⑩ Integrated circuit is also known as \_\_\_\_\_.

## Extra Questions (Ans)

12/05/21  
Wednesday

- ① In fourth generation computer single chip was used.
- ② Full form of CPU → Central Processing Unit  
PC → Personal computer
- ③ The other name of PC is microcomputers.
- ④ The two important event happened during fourth generation are :
  - Millions of transistors were put onto one chip
  - Microprocessor was invented
- ⑤ Integrated circuits <sup>are</sup> used in
  - calculators
  - washing machines
  - cameras
  - Televisions etc.
- ⑥ Vacuum tubes were made of glass.

(7) Name of each generation of computer are:

First generation — ENIAC

Second generation — RCA 501

Third generation — IBM 360

Fourth generation — Personal computers

(8) ENIAC gave off heat because it was built with vacuum tubes.

(9) Transistors are small electronic devices used in the second generation computers.

(10) Integrated circuit is also known as Silicon chip.
