(C) Answer these Questions:

① write two ways in which a computer is different from a human being?

Ans: Computer is different from a human being : [Two ways]

→ The computer is always accurate and never makes mistakes.

→ The computer never gets tired or bored.

② write any four characteristics of a computer?

Ans: Four characteristics are:

→ Versatility [Perform many different functions]

→ Accuracy [Never makes mistakes]

→ Speed [Very fast calculating device]

→ Amount of work [Free from tiredness]

③ what is meant by the term GIGO?
Explain with example

Ans: GIGO → Garbage In Garbage Out

e.g: Suppose you wrote

$5 + 3 = ?$ → Input to computer

But

You wanted $5 - 3 = ?$

So computer will give you output

$5 + 3 = 8$

as you wrote wrong sign i.e '+'
instead of '-'

④ write four limitations of a computer?

Ans: Four limitations:

- It cannot feel like human beings
- It does not have intelligence of its own.
- It can not take decisions.
- It cannot think on its own.

⑤ why is computer called a multipurpose machine?

Ans: Computer is called a multipurpose machine as it can be used to write, draw, play music etc.
