Good Touch : The touch which makes us feel nice and comfortable

- example : * Your mothers touch.
- * Hug your friend.

Bad Touch : It makes us uncomfortable and unsafe.

* People touch in different ways

- Good touch
- Bad touch.

Sense of Smell :

* The nerves in our nose have special endings which pick up the smell in the air you breathe.

example :

good smell : Flowers, Perfumes etc.

Foul smell : Smell of garbage, drain etc.

Differently abled people :

Those who are physically or mentally disabled are called differently abled.

why they are called differently
abled?

Because they are capable of doing
a particular task in a different
way than normal people.

* example : → those who cannot see, hear
or speak
→ those who doesn't have limb
due to accident or disease.

Note : * If one sense is weak in
a person, other senses make up
for it.

* If one of the sense damaged

other senses become strong

* These who can't see → They have
sharp sense of
hearing

→ example of differently abled

↳ Helen Keller [Famous author, teacher]

→ Stephen William Hawking [Scientist]
