Difficult word [Practice 3 times]

- |                |                     |
|----------------|---------------------|
| ① Sight        | ⑤ Differently abled |
| ② Sense organs | ⑥ Braille           |
| ③ Nerve        | ⑦ Author            |
| ④ Sensitive    | ⑧ opportunities     |

(C) Answer these Questions:

(1) Why are the sense organs important?

Ans: Sense organs are important as they help human beings and animals to know the outside world.

For human being—: They are able to see, hear, smell, taste and feel.

For animals—: They find food and escape from danger.

Q (3) Why do your elders tell you not to touch certain things?

Ans: Elders tell us not to touch certain things because those things might be dangerous and you may get hurt.

Q (4) How does your nose help you to smell things?

Ans: The nerves in our nose have special endings that pick of the smell of the air you breathe. So that we can smell things.

Q (5) Who are differently-abled people? What is your duty towards them?

Differently-abled people:

Ans: The people who cannot see, hear, talk or walk are differently-abled people.

Duty towards them:

\* We must be sensitive to their needs and feelings

\* We should help them to be independent and lead a normal life

Q (2) How do our sense organs work?

Ans: Sense organs contain thousands of nerves

Step-1: Nerve pick up signal from outside world

Step-2: They carry them to brain

Step-3: Brain processes the signal

Step-4: Brain send a message back to the particular sense organs.

Step-5: The sense organs react accordingly.
