Difficult words of ch 6 :

- (1) Reproduction
- (2) spores
- (3) Embryo
- (4) vegetative propagation
- (5) Cotyledons
- (6) Germination.
- (7) Radicle
- (8) plumule
- (9) Dispersal
- (10) Dandelion seeds
- (11) Sycamore tree
- (12) Xanthium fruit
- (13) Bursting
- (14) Fleshy part
- (15) cling.
- (16) Scatter
- (17) hooks
- (18) Spines
- (19) water-logging

FUN TO LEARN

A. Fill in the blanks.

1. Mosses reproduce from spores
2. Food for the baby plant is stored in seed leaves called cotyledons
3. The tiny shoot of a baby plant is called Plumule
4. water, Air and Sunlight are required for germination.
5. Seeds are dispersed by wind, water, animals and bursting of fruits
6. Watermelon is a native of South Africa
