Page No. (8)

① Answer these questions:

① Write the distribution of forests in India

Ans: Types of forests are:

- ① Tropical Deciduous forests
- ② Tropical Rain Forest
- ③ Desert vegetation
- ④ Mountain vegetation
- ⑤ Mangrove Forests

② Why are trees called the lungs of the earth?

Ans: Trees are called the lungs of the earth because they give out oxygen and take in carbon dioxide. Oxygen is needed by animals and humans to breathe.

③ Do on your own [Refer the notes]

④ what measures are being taken to protect our forests?

Ans: Measures should be taken :

- * Reforestation
- * Afforestation > planting of trees
- * proper utilisation of forest products

example :-> Paper [Stop wastage of Paper]

-> wood [use alternative method like gobar gas etc to save wood]

⑤ what do you mean by wood-free paper?

Ans: The paper from plant fibre, old cotton rags, tree leaves, jute, straw etc are called wood free paper.

H.W [write New words and Now we know]
