(d) Give Reasons

- ① why we can see different houses in the same area?
- ② why human beings are called social beings?
- ③ why houses in earthquake-prone regions made of wood.
- ④ why stilt houses are built in Rainy and flood-prone regions
- ⑤ why we have different settlement like hamlet, village, town and city.

Date _____
Page _____

Ans of More Reasons :

- Ans!
- ① We can see different houses in the same area as the amount of money a person spends to build house determines the site and design of the houses.
- example: Less money \rightarrow hut
Lot of money \rightarrow Bungalow.

or

Ans: As the economic condition of people are different from each other so as the type of house they live in that why we can see different houses in the same area.

- ② Humanbeings are called social beings as all of them live together in society.
- ③ Houses in earthquake-prone regions are made of wood as it will cause less damage (if it collapses).

④ Stilt houses are built in rainy and flood-prone regions, to keep the house safe from flood waters as well as snakes and insects.

⑤ We have different settlement due to the no of people living in that area.

example Hamlet → Small → very less people
village
City → large → no of people
