A. Read the Bar Graph given below and answer the given questions.

1. How many flights took off from Chennai on this day?
2. Which city had maximum number of flights taking off?
3. What is the total number of flights in these cities?

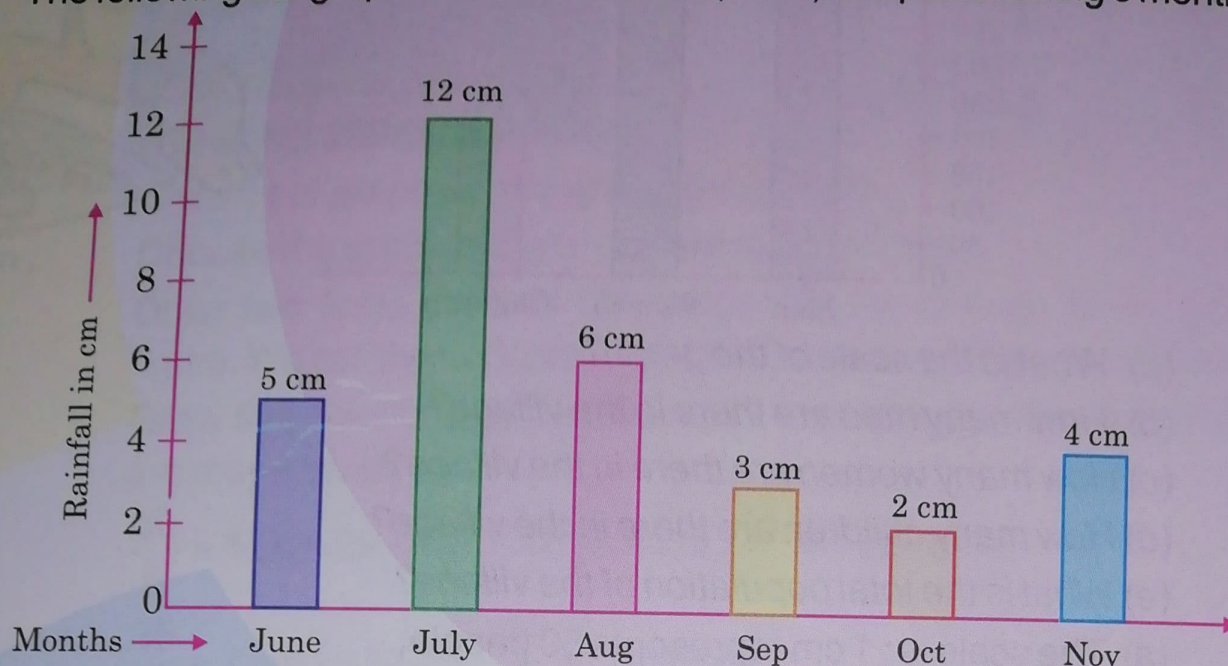

B. The given circle graph shows the favourite leisure-time activities of about 200 people living in a city.

1. Which activity is preferred by most of the people?
2. Which activity is preferred least?
3. How many people prefer to watch TV as their favourite time pass?
4. What percent of people prefer listening music as their favourite leisure-time activity?
5. How many people prefer to play some game after they are off from work?

Draw a bar graph to represent the above data.

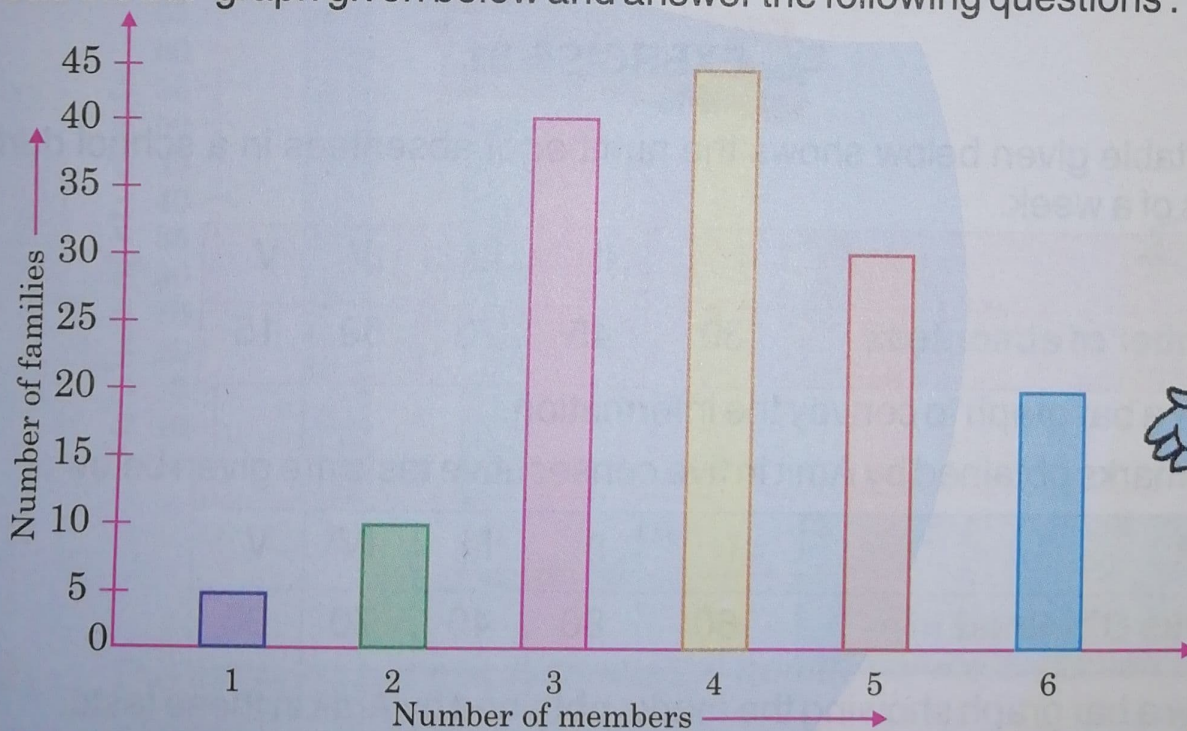

The following bar graph shows the rainfall (in cm) at a place during 6 months of a year.

Read the bar graph carefully and answer the questions that follow :

- In which month the rainfall was maximum?
- How much was the rainfall in September?
- Which month was the driest ?

Read the bar-graph given below and answer the following questions :

- What information does the bar-graph give?
- How many families have 3 members?
- How many families have 6 members?
